Dependencies and Vulnerabilities Check

Unused Dependency Table

Running npx depcheck command, results in the following. This results all the usused dependencies in the package.

Unused Dependencies
audit
better-npm-audit
body-parser
ejs
express
license-checker
npm-install-checks
request

NPM Doctor Results

Running npm doctor command results the following. npm doctor runs a set of checks to ensure that your npm installation has what it needs to manage your JavaScript packages.

Check	Value	Recommendation
npm ping	ok	
npm -v	v6.14.4	Use npm v8.3.0
node -v	v13.14.0	Use node v16.13.1
npm config get registry	https://registry.npmjs.org/	
which git	/usr/bin/git	
Perms check on cached files	ok	
Perms check on global node_modules	ok	
Perms check on local node_modules	ok	
Verify cache contents	verified 786 tarballs	

NPM Outdated Results

Running npm doctor command results the following. This command will check the registry to see if any (or, specific) installed packages are currently outdated.

Package	Current	Wanted	Latest	Location
body-parser	1.18.3	1.19.1	1.19.1	todolist-v1
ejs	2.6.1	2.6.2	3.1.6	todolist-v1
express	4.16.4	4.16.4	4.17.2	todolist-v1
request	2.88.0	2.88.0	2.88.2	todolist-v1

NPM License Results

License-checker module is used to analyze all the Node package licenses in a project. The license-checker first goes through each module in the node_modules directory and looks inside package.json to identify the license.
